## Why Dove Hearing

With Dove Hearing Centres, you'll never get the hard sell when it comes to hearing aids. Instead, we put our complete focus on assessing your hearing, determining the degree of loss and then looking at all the treatment options available to you.

Our hearing specialists will never push you to purchase a product you aren't sure of. Following your hearing test, they will make recommendations on the best course of action and only move forwards on your say so.

Both Neil and Rebecca Cross RHAD MSHAA have over 40 years of experience in hearing care. With Dove Hearing Centres, you will receive free, unbiased advice on how to deal with your hearing loss and the highest level of support possible depending on your individual needs.

## Technical Specifications

The LiNX Quattro 9:

- 17 WARP™ Processing Channels
- Autoscope Adaptive Directionality – The Hearing aid automatically projects a narrow or wide focus depending on whether you are speaking to one or several people in background noise.
- Binaural Environmental Optimiser II - listens to the environment and adjusts accordingly.
- Binaural Directionality III – Enjoy optimal audibility and listening comfort, even when moving rapidly through changing sound environments.
- Spatial Sense - Detects where sounds are coming from, for a more natural sense of your surroundings and the best possible sound quality.

LiNX Quattro 9 is the ultimate hearing aid in this range. It has 17 WARP™ Channels

Key features of the LiNX Quattro range:

- Rechargeable option available - 3 hours of charging time, upto 30 hours of battery life.
- 4 Fully flexible programs – Allowing for personalisation.
- Wind Guard - Recognizes and reduces annoying wind noise
- Expansion - Improves sound quality in quiet situations. It does this by reducing amplification of microphone noise and other very soft sounds which hearing aid wearers aren't interested in hearing.
- Noise Tracker II - GN ReSound's latest generation of noise reduction system, allowing comfortable hearing in noise.
- Synchronised Soft Switching - Detects levels of sound and speech the slowly adapts the microphones to ensure a continuous comfortable listening environment.
- Directional Mix Processor – Personalised for the most appropriate mix of awareness and clarity for each individual. A natural balance of speech clarity and awareness.
- Natural Directionality II - Unique asymmetrical fitting strategy, where one hearing aid is set with a directional fit and the other one is set with an omnidirectional fit. The first ear is thus the Focus ear and the other the Monitor ear.
- Sound Shaper – Helps high frequency sounds to be heard and processed effectively by the wearer if they have a severe/profound high frequency hearing loss.
- DFS Ultra™ II – The adaptive filter accurately identifies and cancels feedback. At the same time, the built in Whistle Control™ predicts feedback and optimises amplification in dynamic situations.
- Music Mode – Brings music back to life
- Auto DFS - Feedback management system.
- Tinnitus Sound Generator with Nature Sounds – Provides you with ways to personalize sound therapy helping you to cope with tinnitus.
- Synchronized Volume & Push Button - Volume adjustments and program changes made on one hearing to both hearing aids.
- Smart Start - delays the switch-on time of your hearing instrument after you have closed the battery compartment. For your comfort while inserting your hearing aid.
- Phone Now - automatic phone detection allows convenient phone conversation.
- Comfort Phone – When on the telephone the hearing aid automatically changes to a dedicated phone program whilst the non-telephone ear hearing aid reduces in volume slightly to help you concentrate whilst still being aware of your environment.
- Ear-to-Ear Communication – Change the volume or program of both hearing aids by adjusting just one of them.

Accessories:

- Unite Micro Mic
- Unite Multi Mic

- Unite Remote Control 2
- Unite TV Streamer 2
- Unite Phone Clip+
- Smart app - Apple iPhone, iPad, and iPod touch app
- Resound Control app - (phone clip required)

## About Dove Hearing Centres

---

Neil and Rebecca Cross RHAD MSHAA started Burton upon Trent Hearing Centre over eleven years ago, it is an independent family run business with over 40 years of hearing industry experience

The success of the business has been based upon giving impartial and professional advice concerning the clients hearing needs and the technology available. The business acquired Wardles Hearing Centre, a 40 year hearing business in 2010, to further expand and develop Dove Hearing Centres the Lichfield branch was opened in 2014.

At their hearing centres in Burton, Lichfield and Stoke-on-Trent they are able to offer a free hearing assessment within a sound proof environment to give an accurate hearing test, which is then explained in detail to you and dependant on the results the decision is made to either have regular check ups or if a hearing aid is required they can talk you through all of the available options.

As an independent Neil and Rebecca work with all the hearing aid manufacturers, unlike many of the national companies who tend to be affiliated to one or two, they can give impartial advice across the wide range of hearing aids, they are also up to 50% cheaper than other companies.

### Services available at Dove Hearing Centres:

- Free hearing test
- Micro-suction wax removal
- Free independent expert advice on all types of hearing systems
- Free ongoing aftercare
- High standards of customer care
- Time to listen to your hearing problems
- Time to help you through your hearing rehabilitation
- All types and sizes of hearing aids from all manufacturers
- 30 day money back guarantee
- Battery service

- Save up to 40% off national Hearing Company prices
- Latest digital hearing aids from £599

If you would like a free no obligation hearing test or would simply like to discuss any hearing or hearing aid queries, please do not hesitate to get in touch.

Rebecca and Neil are so knowledgeable, friendly and helpful that they make the whole process of overcoming hearing loss very manageable through their support. I have moved from their Staffordshire base but travel back to see Rebecca when necessary - and always have a warm welcome. - **Mrs J Preece, Leicestershire**
